(54) Title: METHOD AND APPARATUS FOR PERFORMING INTER-FREQUENCY AND INTER-RAT HANDOVER MEASUREMENTS IN MBMS

(57) Abstract: Disclosed are systems and methods that allow the a mobile communications device to perform inter-frequency and inter-RAT measurements while receiving MBMS data. As disclosed, control of measurement occasions are decided on by the UE using Discontinuous Reception during Forward Access Channel reception. Using aspects of the disclosed embodiments, each UE individually decides when to perform inter-frequency/RAT measurements (provided performance requirements on cell reselection are met). Outer coding procedures may then be performed to recover data lost during the measurements.
